

Intelli-M Access CORPORATE

S-IA-CORP

The infinias Intelli-M Access Control Base Software Kit provides all of the essentials needed to deliver broad access control capabilities to conveniently secure and manage your location, within a simple, intuitive browser-based user interface. The software allows you to view, monitor and report on any or all events and alarms; define multiple security roles, access and privileges for individual users, and use the powerful 'rules engine' to perform a variety of functions including: defining schedules and holiday sets, and designing, building and printing badges with Microsoft Report Builder 3.0.

KEY FEATURES

- ▶ **Customizable Rules Engine** In addition to common access control features, infinias' powerful rules engine allows you to build your own. Define events, advanced filters, and actions to create an unlimited set of custom features – that deliver the RESULTS required for your application. With infinias, the power is in your hands.
- ▶ **People & Groups** Easy management. Manage people, groups, roles, privileges and credentials from a single screen.
- ▶ **Door Status** Improve monitoring. Status icons provide improved door status monitoring. Hover over an image in the legend to bring up a tool tip that explains the icon.
- ▶ **Auto Discovery** Simplify configuration. Auto discovery of door controllers makes configuration easy. Any additional doors added to the system at a later date can benefit from auto discovery as well.
- ▶ **Badges and Reports** Run reports and create badges. Intelli-M Access uses Microsoft's SQL Server Reporting Services to host badges and reports. Many IT groups already use this solution internally and have their own SQL expertise.
- ▶ **LDAP integration** Real-time LDAP updates at the door. This feature provides Active Directory integration and synchronization for easy access control administrative management and real-time LDAP updates at the door.
- ▶ **Calendar Integration** Seamless calendar integration for easy scheduling. The calendar integration feature provides seamless integration with Google Calendar, Microsoft Outlook and Exchange for easy schedule management. You can manage ad hoc lock and unlock schedules for any zone automatically without ever having to log into Intelli-M Access Professional.

+ PLUS

- ▶ **Tiered Management** De-centralized, remote tiered management. This feature enables you to achieve decentralized, remote tiered administrative management and simplified, centralized administration.
